

TEMPLATE

Land feasibility one-page template

Status: INDICATIVE. This is original general working material. It contains no verified client data, market benchmark, survey result, design approval, or professional advice.

How to use this resource

- Use this page to separate verified site facts from assumptions before an investment or design decision.
- Site and access: record parcel reference, approach route, visible constraints, and the date of the visit.
- Ground conditions: note observations only; attach a qualified geotechnical report before relying on soil conclusions.
- Decision log: state the next decision, owner, evidence still required, and the date for review.
